EDUCATION

- **National Institute of Technology Karnataka, Surathkal** **2023 – 2027**
  B.Tech in Civil Engineering, Minor in Management CGPA: 8.20

EXPERIENCE

Data Engineering Intern **May 2026 – July 2026**
Tredence Analytics

- Developed an **agentic AI** system for automated health insurance verification using LLMs and knowledge graph retrieval.
- Built **knowledge graphs** using Google Cloud Spanner Graph for healthcare insurance data.
- Engineered FastAPI backend services to orchestrate graph queries and multi-step agent workflows.
- Built a responsive React frontend for insurance verification and result visualization.

Frontend Developer Intern **Nov 2025 – Jan 2026**
Acredge Landworks Pvt Ltd

- Converted **Figma** designs into responsive, production-ready frontend components.
- Identified and resolved UI and cross-browser issues to improve usability and visual consistency.
- Integrated **REST APIs** to enable seamless data flow between frontend and backend systems.
- Built an internal **task management tool** adopted across the organization to streamline workflow tracking.

PROJECTS

SecureLink | Python, React, MongoDB, Redis, Docker, AWS **May 2026 - July 2026**

- Trained a **phishing-URL classifier (∼96% accuracy)** on 13 engineered features (lexical, TLS, HTML signals), tuned via GridSearchCV and tracked with MLflow/DagsHub.
- Built a **feature extractor** turning raw URLs into model-ready inputs, enforcing train/serve consistency to eliminate feature skew.
- Served the model through a **FastAPI** backend that gates every URL — blocking phishing links with explainable reasons before shortening the safe ones.
- Designed the system for scale with **Redis cache-aside redirects** (sub-millisecond) and rate limiting, keeping the ML check at shorten-time and the database off the hot path.
- Containerized with **Docker** and deployed end-to-end on **AWS** behind a reverse proxy with automatic **HTTPS.**

BookSageAI | React, Python, RAG, Gemini **Nov 2024 - Apr 2025**

- Built an end-to-end **RAG** pipeline for conversational AI over PDFs using **Flask**, **LangChain**, and **Supabase**.
- Developed efficient PDF parsing and **vectorization** workflows, enhancing context delivery to **Gemini** LLM.
- Integrated **pgvector** for hybrid search and accurate vector-based document retrieval.
- Integrated **Serper** API to enable real-time web search and dynamic content generation.
- Designed a responsive frontend using **ReactJS** and **TailwindCSS** for interactive document exploration.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL
Frontend: HTML, CSS, ReactJS, TailwindCSS
Backend: NodeJS, ExpressJS, MongoDB, PostgreSQL
Tools / Platforms: Git, Github, Postman, Docker

ACHIEVEMENTS AND EXTRACURRICULAR

- Ranked Top **100** out of 1000+ teams at **Grab** India Hackathon (2025) for innovative solution development.
- Secured **3rd place** at the Stellar × Polkadot Hackerhouse.
- Secured **5th place** in Hack the Thread, a pan-India solo hackathon organized by 180DC NITK.
- Executive Member at **IE NITK**; mentored junior's, maintained the club's website, and organized technical events and workshops.
